VOLUME CONTENTS

Vol. 138 No. 1 1992

In Memoriam v

G. RÜDIGER and F. SPAHN / On the Stability of Mean-Field Models of the Solar Convection Zone 1

P. R. WILSON / The Reversal of the Solar Polar Magnetic Fields, III 11

V. I. MORDVINOV and E. M. TIKHOMOLOV / On the Rotation of Large-Scale Background Fields in the 21st Cycle of Solar Activity 23

M. H. GOKHALE, J. JAVARAIAH, K. NARAYANAN KUTTY, and B. A. VARGHESE / Global Modes Constituting the Solar Magnetic Cycle, I 35

R. S. RONAN, F. Q. ORRALL, D. L. MICKEY, E. A. WEST, M. J. HAGYARD, and K. S. BALASUBRAMANIAM / A Comparison of Vector Magnetograms from the Marshall Space Flight Center and Mees Solar Observatory 49

ZHANG HONGQI and SONG MUTAO / Vector Magnetogram and Dopplergram Observation of Magnetic Flux Emergence and Its Explanation 69

C. E. ALISSANDRAKIS, A. A. GEORGAKILAS, and D. DIALETIS / Dynamic Phenomena in the Chromospheric Layer of a Sunspot 93

P. VENKATAKRISHNAN, S. K. JAIN, JAGDEV SINGH, F. RECELY, and W. C. LIVINGSTON / Spatio-Temporal Fluctuations in He I 10830 Å Line Parameters: Evidence for Spicule Formation 107

P. RUDAWY and P. HEINZEL / Hydrogen Photoionization Rates for Chromospheric and Prominence Plasmas 123

J. J. ALY / Some Properties of Finite Energy Constant-α Force-Free Magnetic Fields in a Half-Space 133

S. M. WHITE, G. THEJAPPA, and M. R. KUNDU / Observations on Mode Coupling in the Solar Corona and Bipolar Noise Storms 163

G. POLETTO and Z. ŠVESTKA / The Birth of Giant Post-Flare Arches 189

SOLAR PHYSICS LETTERS:

A. P. KLASSEN / Spectral Structures of Type "Line" in the Microwave Burst Emission at the Sun 201

V. K. VERMA, G. C. JOSHI, and D. C. PALIWAL / Study of Periodicities of Solar Nuclear Gamma Ray Flares and Sunspots 205

R. A. GULYAEV / On a Possible Use of Total Solar Eclipse below the Horizon for Observations of the Inner Zodiacal Light (as Applied to the Eclipse of 30 June, 1992) 209

VOLUME CONTENTS

Vol. 138 No. 2 1992

J.-C. PECKER, S. DUMONT, and Z. MOURADIAN / Structure and Physics of Solar Faculae, V 213

E. CORREIA, P. KAUFMANN, and F. M. STRAUSS / Compact Sources of Suprathermal Microwave Emission Detected in Quiescent Active Regions during Lunar Occultations 223

MARCEL GOOSSENS, JOSEPH V. HOLLWEG, and TAKASHI SAKURAI / Resonant Behaviour of MHD Waves on Magnetic Flux Tubes, III 233

B. INHESTER, J. BIRN, and M. HESSE / The Evolution of Line-Tied Coronal Arcades Including a Converging Footpoint Motion 257

B. N. DWIVEDI and A. K. GUPTA / Emission Lines from O IV as a Plasma Diagnostic 283

G. S. CHOE and L. C. LEE / Formation of Solar Prominences by Photospheric Shearing Motions 291

A. W. HOOD, E. R. PRIEST, and U. ANZER / The Fibril Structure of Prominences 331

K. R. SIVARAMAN, R. R. RAUSARIA, and S. M. ALEEM / Magnetic Shear in Flaring Regions, I 353

A. ANTALOVÁ and M. B. OGIR / The Hα Development of an Intense Limb Flare and Associated Flaring Arches 361

HARI OM VATS / Flare-Associated High-Speed Solar Plasma Streams 379

DOUGLAS V. HOYT and KENNETH H. SCHATTEN / A New Look at Wolf Sunspot Numbers in the Late 1700's 387

M. H. GOKHALE and J. JAVARAIAH / Global Modes Constituting the Solar Magnetic Cycle, II 399

SOLAR PHYSICS LETTERS:

L. ACHMAD / Depth of Formation of Lines in the Solar Atmosphere 411

V. N. DERMENDJIEV, K. Y. STAVREV, and P. L. ANDREEVA / Prominence Activity during the Ascending Phase of Solar Cycle 22 415

NORMAN MURRAY / High Latitude Solar Magnetic Fields 419

Book Review

R. J. Bray, L. E. Cram, C. J. Durrant, and R. E. Loughhead, *Plasma Loops in the Solar Corona* (J. KLECZEK) 423

Erratum 425

Calendar 427
